Colours shown:
Bicycle guard: Sand grey 900
Plate: Sand grey 900

Colours can be selected from the RAL shades or other textured shades from the Akzo Nobel Futura range.

Presentation

The bicycle guard encourages the development of cycling in the city.

The bicycle guard has been designed and developed in a specific Sineu Graff eco-design approach. They have a sober design. This design has been optimised to reduce raw materials and energy to manufacture.

Description

The bicycle guard is made of a zinc and powder coated steel bent tube $\varnothing 42$ mm and 3 mm thick.

The plate is made of 5 mm thick steel with a laser-cut "Bicycle parking" pictogram.

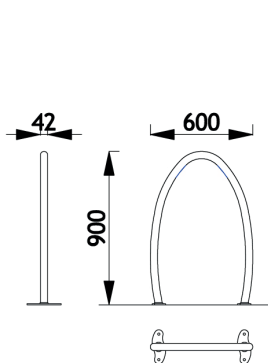

For optimum protection against rust and long-term performance, the steel elements are zinc coated first, and go through our powder blast process (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder).

The sealing base plates are 8 mm thick.

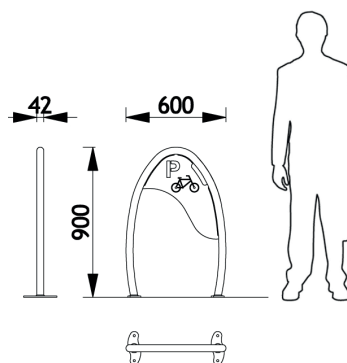

4 sealing points, $\varnothing 13$ mm, for the base plate version.

Delivered assembled.
