

ALIYOU ARMCHAIR

ALIYOU ARMCHAIR
Ref: 13 6015

➤ Presentation

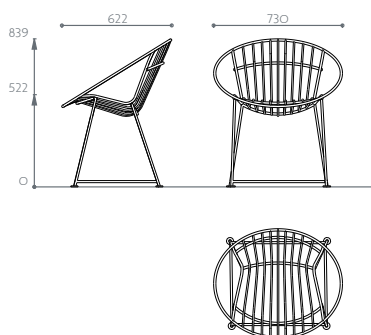

With its ever-so sleek lines, its diaphanous look and its industrial design, the Aliou armchair adds a positively trendy touch to outdoor spaces. Its unique silhouette breaks the codes of classic urban furniture: designed entirely in reinforcing steel bars, the armchair disrupts the usual choice of materials used for seating in the public space. Its curves have been designed for an optimal comfort. With the Aliou armchair, Sineu Graff reinvents the urban furniture for unique layouts and relaxing moments.

➤ Description

The main frame is made of Ø12 mm reinforcing steel bars. The seat is made of Ø8 mm reinforcing steel bars and the ends of the legs are 10 mm-thick steel discs.

The whole is machine-welded, treated for accelerated rusting and protected from rust staining with varnish. Delivered assembled.
