Colours can be selected from the RAL shades or other textured shades from the Akzo Nobel Futura range.

Présentation

The Confort seats 1 & 2 and the Interméde bench are of a classic design. Their cast iron legs offer an great resistance and longevity to the furniture. The wooden slats bring warmth and aesthetic harmony to the range. These comfortable urban furniture integrate easily into your public spaces.

Description

The **seatings and backrests** of the seats are made of **wooden slats** (5 slats for Confort 1, 6 for Confort 2 and 3 for the bench). The **legs of the seats and bench** are made of **cast iron**.

Our woods are exclusively collected in sustainably managed forests. Of high quality, they are PEFC labeled for local sourcing, FSC® labeled for exotic hardwoods, or comply with the EUTR (EU Wood Regulations).

Stained wood: after the application of a **flow coat**, the wood is coated with an aqueous, solvent-free wood stain emulsion to guarantee added protection and durability.

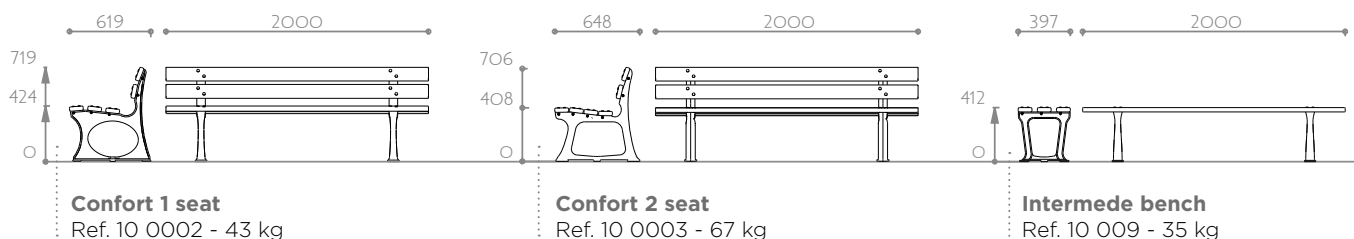

For optimum protection against rust and long-term performance, the steel and cast iron elements are zinc coated first, and go through our powder blast process (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder). Cast-iron parts are produced in a foundry located close to our factory in France.

The slats are fastened to the legs with screws and nuts
2 anchoring points. Delivered assembled.

Presentation

The Confort City furniture has a seat and backrest made of steel, according to a patented SINEU GRAFF assembly system, which gives it maximum strength and comfort. The cast iron legs ensure resistance and good anchoring to the ground. The transparency of the metal frame gives the furniture a light appearance while guaranteeing its resistance.

Description

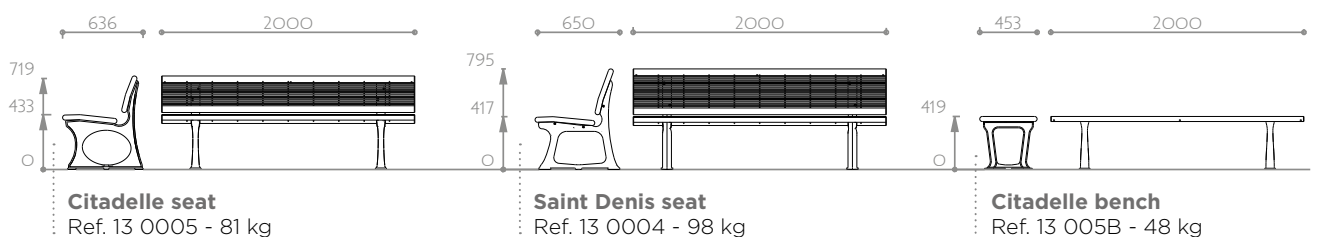

The **setings and backrests** consist of 2 **City type steel tubes** 50 x 40 mm thick, 8 mm diameter **rods**, 2 **flat fixing irons** 6 mm thick, 2 **flat end metal sheets** 4 mm thick and 9 **reinforcements** 5 mm thick.

The **legs of the seats and bench** are made of **cast iron**.

For optimum protection against rust and long-term performance, the steel and cast iron elements are zinc coated first, and go through our powder blast process (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder). Cast-iron parts are produced in a foundry located close to our factory in France.

The slats are fastened to the legs with screws and nuts
2 anchoring points. Delivered assembled.

Colours

Legs colour can be selected from the RAL shades or other textured shades from the Akzo Nobel Futura range.

Presentation

The Confort seats 1 & 2 and the Intermede bench are of a classical design. The seat is made of reinforced recycled plastic slats. This material is the ideal solution for areas subject to high stress as it does not require any special maintenance. These comfortable street furniture integrate easily into your public spaces.

Description

The seating part and backrest of the bench are made of 6 soft recycled plastic slats, 35 x 105 mm thick.

The seating part of the bench consists of 3 soft recycled plastic slats with a section of 35 x 105 mm.

Each reinforced recycled plastic slat has a galvanised steel core for optimum performance and stability of the seat. An additional intermediate reinforcement in zinc and powder coated steel provides a perfect finish to the bench and seat. It also guarantees the regularity of the spaces between the slats.

The **legs of the seats and bench** are made of **cast iron**.

For optimum protection against rust and long-term performance, the steel and cast iron elements are zinc coated first, and go through our powder blast process (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder). Cast-iron parts are produced in a foundry located close to our factory in France.

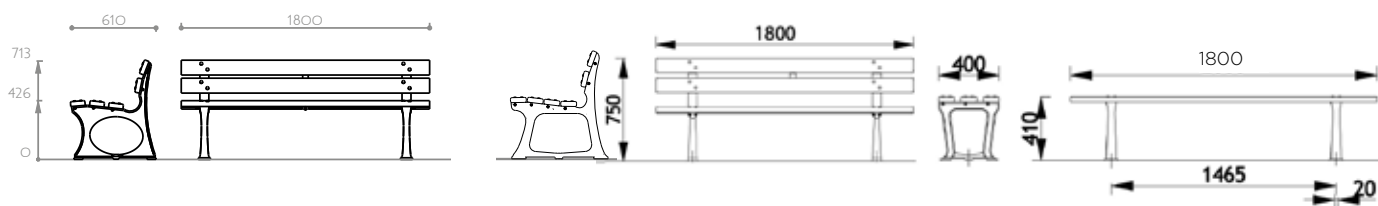

The slats are fastened to the legs with screws and nuts

Seats: 4 anchoring points.

Bench: 2 anchoring points.

Présentation

The Nature seat combines cast iron and cut steel to offer a contemporary version of the Confort seat. The cast iron legs are those of a Confort seat. The seat is made of steel, decorated with a Nature pattern cut out of the material. The sober and sleek design of the Nature range fits into any environment. These seats are matching with our contemporary litter bin with the Nature covering.

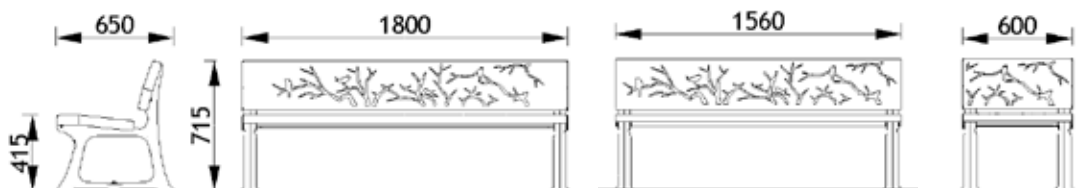

Description

The seatings and backrests of the seats are made of 4 mm thick steel sheet, strengthened by bending and decorated with a stylized laser-cut Nature pattern, and the legs are made of painted cast iron.

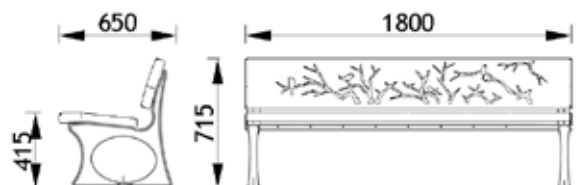

For optimum protection against rust and long-term performance, the steel and cast iron elements are zinc coated first, and go through our powder blast process (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder). Cast-iron parts are produced in a foundry located close to our factory in France.

The slats are fastened to the legs with screws and nuts
2 anchoring points (Ø 22 mm). Delivered assembled.
