Wood stains

EXOTIC WOOD	EXOTIC WOOD OR ASH	EXOTIC WOOD OR ASH	EXOTIC WOOD OR ASH
non stained	with natural wood stain	with mahogany wood stain	with walnut wood stain

Presentation

Metropolis has a contemporary line. The graphic aspect of this urban furniture is obtained thanks to the assembly of the wooden slats as well as the particular shape of the massive cast iron legs. The compact silhouette of Metropolis ensures a remarkable presence and gives a modern image to your layouts.

The Metropolis range offers a 3 place seat and as a 3 place bench.

Description

The **seating part and backrest** of the seat are made up of 7 **wooden slats**, 38 x 105 mm thick, of which 3 are rounded (2 at the ends and one in the middle) following the curvature of the **cast iron legs**.

The **seating part of the bench** consists of 4 **wooden slats**, 38 x 105 mm thick, of which 2 are located at the ends and rounded. The **legs** of the bench are made of **cast iron**. A 4 mm thick **steel reinforcement** in the middle supports the bench seat.

Our woods are exclusively collected in sustainably managed forests. Of high quality, they are PEFC labeled for local sourcing, FSC® labeled for exotic hardwoods, or comply with the EUTR (EU Wood Regulations).

Stained wood: after the application of a **flow coat**, the wood is coated with an aqueous, solvent-free wood stain emulsion to guarantee added protection and durability.

For optimum protection against rust and long-term performance, the steel and cast iron elements are zinc coated first, and go through our powder blast process (after having been cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder). Cast-iron parts are produced in a foundry located close to our factory in France.

The assembly of the slats on the seat and bench legs is done with screws and inserts.

The middle reinforcement is screwed under the bench seating part.

2 anchoring points for the seat, 4 for the bench.

Delivered assembled.
