**ASHTRAYS**  
& LITTER BINS with ASHTRAYS

INVENTED AND PRODUCED IN FRANCE

**Every year in France, 30 billion cigarette butts are thrown on the ground ...**

Butts are part of daily incivilities, are detrimental to the quality of life, to the image of the city and have a significant cost for the community. **To avoid sidewalks to be open ashtrays, cities undertake many actions (communication campaigns, fines ...).**

**To effectively support communities in their fight, Sineu Graff has developed a comprehensive range of ashtrays.**

Installed in strategic locations, in pedestrian pathways or in front of shops, these Sineu Graff street furniture are easily identifiable in the public space (colors and textures of the visibility strips or signs are to be chosen in the RAL or AkzoNobel color charts) to encourage people to behave properly.

FOR **66%**

of citizens, **the cleanliness of the streets contributes to feel good in the city.**
