Body, lid and base : stainless steel

Presentation

This round litter bin is entirely made of stainless steel, with a diamond-point pattern body for maximum strength.

Description

The litter bin is entirely made of 316L stainless steel, is composed of a 2,5 mm thick body, embossed with the "Diamond Point" pattern, a 2,5mm thick lid and a 4 mm thick base.

Bag holder version: the bag holder is made of steel and is hinged.

Liner version: the liner is made of 304 L stainless steel for increased durability and high resistance

The stainless steel is treated, after manufacturing, by sanding, electro-polishing for the lid and bead-blasting for the body, then passivation.

The lid of the litter bin is connected to the body with hinges.

The body of the litter bin is fixed to the base with screws.

Closing is automatic and opening is to be done with a triangular key.

3 sealing points Ø 13 mm.

Delivered assembled.

Presentation

The **Oblong litter bin** is ideal for helping ensure your **restricted spaces** stay clean and tidy. It was designed so it can be easily installed in a **footpath**. Thanks to its **small depth** (less than 30 cm), its streamlined contours do not take up much space. An ashtray or snuffer plate can be added, providing the cigarette butts collection. Waste collection is easier, as the bin body swivels, enabling the liner or the bag to be quickly removed.

The different styles, wide selection of colours and textures, options and features mean the Oblong bin ensures ease of use, adaptation to usage conditions and an understated design.

Description

Litter bin with liner: the liner is made of galvanised steel.

Litter bin with bag holder: the bag holder is made of steel.

The body and the frame consists of 2 triangular posts, are made of 2.5 mm thick steel.

The various elements are assembled with stainless steel screws.

The stainless steel is treated, after manufacturing, by sanding, electro-polishing for the lid and bead-blasting for the body, then passivation.

4 sealing points (baseplates version).

Delivered assembled.

The mark of responsible forestry

Options

Liner

The liner is made of galvanised steel for longevity and high resistance. The litter bin body swivels to make waste collection easier.

Bag holder

The articulated plastic bag holder in steel is attached to the litter bin body. It is fitted with a hoop and a rigid ring. Both components can be removed. The ring folds down onto the hoop to ensure the bag is firmly held in place.

Lock

The stainless steel lock is self-closing. A triangular key, supplied by Sineu Graff, is used to open it.

Fixings

On baseplates : The baseplates are made of 6 mm thick steel.

To be buried : extended steels parts, reinforced with Ø4 mm thick steel cornerpiece.

Wall fastenings are in 4 mm thick steel.

Features

Rain shield

The rain shield is made of 5-mm thick steel. In addition to its main function, the rain shield limits the opening, thus prevents its use for household or bulky waste.

Ashtray

It is made of stainless steel. The ashtray is emptied by opening a hatch mounted on 2 spring hinges.

1 liter = 400 cigarettes butts

Cigarette snuffer

It is made of stainless steel. It offers users a surface that they can stub out cigarettes on. The surface area has a cigarette-smoke swirl cut by laser, so users can easily recognise it. The cigarette snuffer is made of two 2-mm thick, superimposed, passivated stainless steel plates, to ensure the painted components remain undamaged. The cigarette snuffer is directly fixed to the litter bin body by rounded-head stainless steel rivets.
