non stained	with natural wood stain	with mahogany wood stain	with walnut wood stain

> Presentation

The Rendez vous litter bin is round and featured with a wooden cladding which gives it a natural and warm appearance. This urban furniture is a perfect match for our Rendez vous range of seatings furniture.

> Description

The body of the litter bin is made up of 2 top and bottom supports in zinc and powder coated steel, 3 mm thick, with a wooden cladding.

The base of the litter bin is made of 4 mm thick zinc and powder coated steel.

The lid of the litter is made of 5 mm thick powder coated cast aluminium.

Bag holder version: the bag holder is made of steel and is hinged.

Liner version: the liner is made of galvanised steel for increased longevity and high resistance.

Our woods are exclusively collected in sustainably managed forests. Of high quality, they are PEFC labeled for local sourcing, FSC® labeled for exotic hardwoods, or comply with the EUTR (EU Wood Regulations).

Stained wood: after the application of a **flow coat**, the wood is coated with an aqueous, solvent-free wood stain emulsion to guarantee added protection and durability.

For optimum protection against rust and long-term performance, the steel elements are zinc coated first, and go through our powder blast process (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder).

The lid of the litter bin is assembled with a hinged axle.

The wooden slats are fixed to the body bin with screws.

Closing is automatic and opening is to be done with a triangular key.

4 anchoring points (Ø 13 mm).

Delivered assembled.

Presentation

The square shaped litter bin is part of a range of classic, high-quality street furniture made of steel and wood. It will easily find its place in your urban spaces and parks.

Description

The litter bin is made of a body with straight wooden slats and corner slats with anodised aluminium ends, a top and bottom supports made of 3 mm thick steel, a 5 mm thick steel lid, a 4 mm thick steel square base and a 304 L quality stainless steel liner for increased durability and high resistance.

Our woods are exclusively collected in sustainably managed forests. Of high quality, they are PEFC labeled for local sourcing, FSC® labeled for exotic hardwoods, or comply with the EUTR (EU Wood Regulations).

Stained wood: after the application of a **flow coat**, the wood is coated with an aqueous, solvent-free wood stain emulsion to guarantee added protection and durability.

For optimum protection against rust and long-term performance, the steel elements are zinc coated first, and go through our powder blast process (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder).

LITTER BINS | WOODEN RANGE - OBLONG

MODEL SHOWN: OBLONG - WOOD
REF: 20 0557 PLA

Colours

Colours shown:

Wood: Natural tint

Lid and posts: Grey sand 900

Colours can be selected from the RAL shades or other textured shades from the Akzo Nobel Futura range.

Presentation

The **Oblong litter bin** is ideal for helping ensure your **restricted spaces** stay clean and tidy. It was designed so it can be easily installed in a **footpath**. Thanks to its **small depth** (less than 30 cm), its streamlined contours do not take up much space. An ashtray or snuffer plate can be added, providing the cigarette butts collection. Waste collection is easier, as the bin body swivels, enabling the liner or the bag to be quickly removed.

The different styles, wide selection of colours and textures, options and features mean the Oblong bin ensures ease of use, adaptation to usage conditions and an understated design.

Description

Bag holder version: the bag holder is made of zinc and powder coated steel.

Liner version: the liner is made of galvanised steel for increased longevity and high resistance.

The **frame** is made of 2 triangular posts, made of 2.5 mm thick steel. The body is composed of wooden slats, a 2.5 mm thick steel upper and a lower supports with a 2.5 mm thick steel base.

The different components are all attached to each other with stainless steel swsrews.

Our woods are exclusively collected in sustainably managed forests. Of high quality, they are PEFC labeled for local sourcing, FSC® labeled for exotic hardwoods, or comply with the EUTR (EU Wood Regulations).

Stained wood: after the application of a **flow coat**, the wood is coated with an aqueous, solvent-free wood stain emulsion to guarantee added protection and durability.

For optimum protection against rust and long-term performance, the steel elements are zinc coated first, and go through our powder blast process (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder).

4 sealing points Ø 16 mm (version on baseplates).

Delivered assembled.

LITTER BINS | WOODEN RANGE - OBLONG

> Wood stains

EXOTIC WOOD	EXOTIC WOOD OR ASH	EXOTIC WOOD OR ASH	EXOTIC WOOD OR ASH
non stained	with natural wood stain	with mahogany wood stain	with walnut wood stain

> Options

| Liner

The liner is made of galvanised steel for longevity and high resistance. The litter bin body swivels to make waste collection easier.

| Bag holder

The articulated plastic bag holder in steel is attached to the litter bin body. It is fitted with a hoop and a rigid ring. Both components can be removed. The ring folds down onto the hoop to ensure the bag is firmly held in place.

| Lock

The stainless steel lock is self-closing. A triangular key, supplied by Sineu Graff, is used to open it.

| Fixings

On baseplates : The baseplates are made of 6 mm thick steel.

To be buried : extended steels parts, reinforced with Ø4 mm thick steel cornerpiece.

Wall fastenings are in 4 mm thick steel.

> Features

| Rain shield

The rain shield is made of 5-mm thick steel. In addition to its main function, the rain shield limits the opening, thus prevents its use for household or bulky waste.

| Ashtray

It is made of stainless steel. The ashtray is emptied by opening a hatch mounted on 2 spring hinges.

1 liter = 400 cigarettes butts

| Cigarette snuffer plate

It is made of stainless steel. It offers users a surface that they can stub out cigarettes on. The surface area has a cigarette-smoke swirl cut by laser, so users can easily recognise it. The cigarette snuffer is made of two 2-mm thick, superimposed, passivated stainless steel plates, to ensure the painted components remain undamaged. The cigarette snuffer is directly fixed to the litter bin body by rounded-head stainless steel rivets.

Colours

Colours shown:

Wood: Ash with autoclave treatment
Legs: Galvanised steel, not painted

Lid and base also available in zinc and powder coated steel.

Colours can be selected from the RAL shades or other textured shades from the Akzo Nobel Futura range.

Presentation

The litter bin comes from the Link range. The contemporary reinterpretation of this furniture brings sobriety, elegance and conviviality for an efficient integration in any type of environment.

The Link range is eco-conceived, the design limits the consumption of material through simple shapes and optimises transport.

Description

The litter bin is made of a galvanised steel base, body and door made of 12 wooden slats, 45 x 130 mm, lock guide and cover made of 4 mm thick galvanised steel, 450 x 450 mm.

Bag holder version: the bag holder is made of galvanised steel. It is guided under the lid.

Liner version: the liner is made of galvanised steel for increased longevity and high resistance.

Our woods are exclusively collected in sustainably managed forests. Of high quality, they are PEFC labeled for local sourcing, FSC® labeled for exotic hardwoods, or comply with the EUTR (EU Wood Regulations). The ash undergoes a clear fungicidal and insecticidal treatment by autoclave.

For optimum protection against rust and long-term performance, the **steel elements are zinc coated** first, and go through **our powder blast process** (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder) or **hot-dip galvanized** (immersion of the parts in a bath of molten zinc at 450°).

The slats are fixed with screws.

Closing is automatic and opening is to be done with a triangular key.

The door hinges are not visible.

4 sealing points.

Delivered assembled.

> Options

| Liner

The inner liner is made of galvanised steel.

| Bag holder

The steel bag holder is mounted on a hinged axle. It is equipped with a round mobile rim that folds onto a flat hanger to guarantee optimal support for the bag. The base of the bag holder are equipped with rubber stops to avoid any shock when closing the lid.

> Features

| Cigarette snuffer

The 235 x 60 mm cigarette snuffer is made of 316 L stainless steel. The snuffer is riveted to the lid.

| Lid

The lid is made of 4 mm thick galvanised steel. In addition to its primary use as a protection against rain, it limits the opening dedicated to urban waste and thus avoids the deposit of household or bulky waste.
