Presentation

The **Oblong litter bin** is ideal for helping ensure your **restricted spaces** stay clean and tidy. It was designed so it can be easily installed in a **footpath**. Thanks to its **small depth** (less than 30 cm), its streamlined contours do not take up much space. An ashtray or snuffer plate can be added, providing the cigarette butts collection. Waste collection is easier, as the bin body swivels, enabling the liner or the bag to be quickly removed.

The different styles, wide selection of colours and textures, options and features mean the Oblong bin ensures ease of use, adaptation to usage conditions and an understated design.

Description

Litter bin with **liner**: stainless steel liner.

Or : Litter bin with **plastic bag holder** made of steel.

Steel covering: The **body** and **frame** are composed of 2 triangular posts, made of 2.5 mm thick steel.

Wood covering: The **frame** is comprised of 2 triangular posts, made of 2.5 mm thick steel. The body is composed of wood slats, a 2.5 mm thick steel upper hoop and a lower hoop with a 2.5 mm thick steel base.

The different components are attached to each other with stainless steel bolts.

WOOD: After application of Flow-Coat, the wood is coated with an aqueous emulsion stain, without the use of solvents. Our wood comes exclusively from sustainably-managed forests. Our local wood is preferably PEFC-certified, and our exotic wood is FSC®-certified or they comply with the procedures involving due diligence in accordance with the EUTR (European Union Timber Regulation).

STEEL: The **steel components are zinc-coated** then treated with our **Powder Blast** process (after cleaning and shot-blasting, the parts are coated with an initial layer of epoxy powder and a second layer of polyester powder) to provide rust-proofing and to increase its lifespan.

4 sealing points (version on baseplates).

Delivered assembled.

Dimensions

42-liters bin Ref: 20 0520N MUR
Weight* with bag holder: 19 kg
38-liters bin Ref: 20 0521N MUR
Weight* with liner: 23 kg

▸ Options

| Liner

The liner is made of galvanised steel for longevity and high resistance. The litter bin body swivels to make waste collection easier.

| Bag holder

The articulated plastic bag holder in steel is attached to the litter bin body. It is fitted with a hoop and a rigid ring. Both components can be removed. The ring folds down onto the hoop to ensure the bag is firmly held in place.

| Lock

The stainless steel lock is self-closing. A triangular key, supplied by Sineu Graff, is used to open it.

| Fixings

On baseplates : The baseplates are made of 6 mm thick steel.

To be buried : extended steels parts, reinforced with Ø4 mm thick steel cornerpiece.

Wall fastenings are in 4 mm thick steel.

OBLONG RANGE

➤ Features

| Rain shield

The rain shield is made of 5-mm thick steel. In addition to its main function, the rain shield limits the opening, thus prevents its use for household or bulky waste.

| Ashtray

It is made of stainless steel. The ashtray is emptied by opening a hatch mounted on 2 spring hinges.

1 liter = 400 cigarettes butts

| Cigarette snuffer

It is made of stainless steel. It offers users a surface that they can stub out cigarettes on. The surface area has a cigarette-smoke swirl cut by laser, so users can easily recognise it. The cigarette snuffer is made of two 2-mm thick, superimposed, passivated stainless steel plates, to ensure the painted components remain undamaged. The cigarette snuffer is directly fixed to the litter bin body by rounded-head stainless steel rivets.

➤ Also available in stainless steel
