

# BICYCLE GUARD | REVERSE V

## REVERSE V

Ref: 43 0170 / 43 0171

## REVERSE V WITH PARKING PATTERN PLATE

Ref: 43 0174 / 43 0175

### ➤ Presentation

The bicycle guard encourages the development of cycling in the city.

The bicycle guard has been designed and developed in a specific Sineu Graff eco-design approach. They have a sober design. This design has been optimised to reduce raw materials and energy to manufacture.

### ➤ Description

The bicycle guard is made of a zinc and powder coated steel bent tube, Ø42 mm and 3 mm thick.

The plate is made of 5 mm thick steel with a laser-cut "Bicycle parking" pictogram.

**For optimum protection against rust and long-term performance**, the steel elements are zinc coated first, and go through our powder blast process (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder).

The sealing base plates are 8 mm thick.

4 sealing points Ø 13 mm for the base plate version.

Delivered assembled.

### ➤ Dimensions

#### Reverse V

Ref: 43 017x - 7 kg

#### Reverse V with parking pattern plate

Ref: 43 017x - 9 kg

### ➤ Sealings

To be buried  
TYPE A
