*Colors to be chosen from RAL shades, sanded or other textures from AkzoNobel's Futura range.*

Labels to be customized according to the type of waste

## ➤ Presentation

Sineu Graff offers a variety of solutions to support you in your waste management policy. Sorting shelters are aesthetic furniture, they hide the unattractive waste containers, while they encourage the user to a good behaviour. The shelter encourages selective sorting thanks to clear signs: a color code identifies the type of waste to be sorted.

## ➤ Description

The sorting shelter is mechanically welded and painted zinc-plated steel made of:

- lateral tubular structures (2 frames at the left and right ends),
- steel sheets at the end panels, fixed to the end frames,
- 1 laser cut back panel,
- 1 laser-cut front door, fitted with a semi-automatic stainless steel lock,
- 1 inclined cover with a front opening for any kind of waste,
- 2 labels:

The grey plate for household waste, with a rectangular opening, 300 x Ht 180 mm,

The yellow plate is for packagings and recyclable papers. The opening is elliptical (220 x Ht 180 mm) and rectangular (415 x Ht 45mm). The rectangular opening is made for pizza boxes).

- reinforcements on the roof, which also avoids seating

Access for the handling on the side.

It is possible to attach 4 lifting rings (not supplied) to the corners of the upper part of the roof.

Several shelters can be assembled together, using screws through the side frames (caps on the holes).

For optimal protection against rust and long-lasting performance, **the steel elements are first treated by zinc plating, then treated according to our Powder Blast process** (after cleaning and shot-blasting, the parts are coated with a first coat of epoxy powder, and a second coat of polyester powder).

Delivered assembled.

## ➤ Dimensions

**Selective shelters 2x 360 litres**  
 Weight: 339 kg
