Presentation

The generosity of the noble materials - wood and cast iron - gives character to the Rendez-vous line and makes it a sure value for your layouts.

The curve backrest of the Rendez-vous seat offers comfort to the user for long relaxation moments.

The Rendez-vous line offers a seat, straight and curve benches and a high table, allowing you to modulate space, play with straight and curved lines, occupy small and large areas and create places for relaxation and conviviality.

Description

The **seating parts and backrests** are made of 52 x 48 mm **wooden slats**.

The **legs of the seat and benches** are made of **cast iron**.

The **table board** is made up of 9 **wooden slats**, 33 x 80 mm thick, 2 **steel reinforcement** 5 mm thick, 2 **steel sheet legs** 8 mm thick and a 5 mm thick **steel stiffener**.

Our woods are exclusively collected in sustainably managed forests. Of high quality, they are PEFC labeled for local sourcing, FSC® labeled for exotic hardwoods, or comply with the EUTR (EU Wood Regulations).

Stained wood: after the application of a **flow coat**, the wood is coated with an aqueous, solvent-free wood stain emulsion to guarantee added protection and durability.

For optimum protection against rust and long-term performance, the steel and cast iron elements are zinc coated first, and go through our powder blast process (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder). Cast-iron parts are produced in a foundry located close to our factory in France.

The seating parts and backrest are assembled on the legs using screws and nuts.

The table slats are fixed to the legs using inserts in the wood. The table reinforcements are fastened with wood screws.

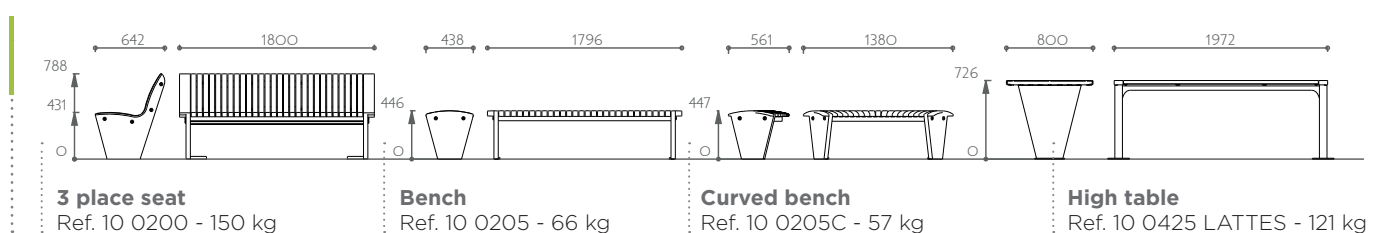

4 anchoring points for the seats and benches, 8 for the table.

Delivered unassembled.

Presentation

The Rendez-vous City range is made of steel wires, using a patented SINEU GRAFF assembly system, which gives maximum strength and comfort. The transparency of the grille of the furniture plays harmoniously with light and gives transparency for an optimal integration into its environment.

The curve of the backrest, combined with the perfect finish of the seating part, offer the user a pleasant feeling of comfort for long stops in public spaces.

The combination of cast iron and steel makes the Rendez-Vous City range uniquely resistant furniture as it requires no particular maintenance. The Rendez-Vous City line offer a seat, straight and curve benches and a high table, allowing you to modulate space, play with straight and curved lines and occupy small and large areas.

Description

The **seating part and backrest** are made of 2 **City type steel tubes**, 50 x 40 mm thick, 18 **rods** 8 mm diameter, 2 **flat bars** 4 mm thick at the ends and 7 **reinforcements** 5 mm thick for the seat and the bench (3 for the curve bench).

The **legs** of the seat and benches are made of **cast iron**.

The **table board** is made of 2 **City type steel tubes** 50 x 40 mm thick, 43 **rods** 8 mm diameter, 2 **flat bars** 6 mm thick at the ends and 8 **reinforcements** 5 mm thick in the middle.

The **legs of the table** are made of **steel** with an 8 mm thick anchoring plate.

For optimum protection against rust and long-term performance, the steel and cast iron elements are zinc coated first, and go through our powder blast process (after having being cleaned and shot-blasted, the parts are coated with a primary layer of epoxy powder, followed by a second layer of polyester powder). Cast-iron parts are produced in a foundry located close to our factory in France.

The furniture is assembled using screws and nuts.
